Pranav-designs PRANAV MOHITE

SKILLS

- **IOT , CIRCUIT SIMULATION AND DESIGN**
- **HARDWARE INTERFACING , HTML, CSS,**
- **Python ,C ,C++**

EDUCATION

- Electronics and Telecommunications |MIT Academy of Engineering *CGPA*: *8.2*|
- XII (HSC) | Chaitanyas International School *73.6%*| *2024*
- X (SSC) | Brilliant Academy English Medium School 89.0%|2022

EXPERIENCE

- **Summer Intern | Jackson Distributed Energy , Phaltan.** (May '25-jul'25)
  Assisted in electrical project planning, load analysis, and generator systems.
  Gained practical exposure to power distribution and renewable energy solutions.

ACADEMIC PROJECTS

- **Fits in Bicycle(Ongoing)**
  Designed and developed a bicycle-mounted health monitoring system using ESP32 to measure heart rate, SpO_2, and body temperature.Integrated MAX30102 pulse oximeter and temperature sensor with real-time data display on an LCD.Implemented I^2C communication and sensor data processing for reliable physiological monitoring.The system provides on-bike health insights for rider safety and fitness awareness.

- **Automated Line Crossing Detection System**
  Designed a system using sensors to detect unauthorized or accidental line crossing in areas like sports grounds, airport queues, or restricted zones, enhancing security and order.

- **Mini Radar System**
  Designed and developed a radar detection system using Arduino, ultrasonic sensor, and servo motor for object detection.Implemented real-time distance measurement by sweeping the sensor using a motor mechanism.Visualized detected objects using Processing software with a radar-style graphical interface.The project demonstrates embedded system control, sensor interfacing, and data visualization.

ACHIEVEMENTS

- Qualified for the **International Youth Math Challenge (IYMC) – Pre-Final Round**
- Designed and published a personal digital portfolio website

HOOBIES/INTEREST

- Playing Video games
- Building Robotic System
